No Delays: Imaging Appointments When You Need Them

We are pleased to offer same-day appointments for CT, General Ultrasound, and X-ray across our locations. We understand the importance of timely diagnosis, especially for patients presenting with acute or urgent conditions. X-rays are available on a walk-in basis with no appointment required, and same-day slots for CT and ultrasound can be arranged quickly via phone. All eligible services are bulk billed under Medicare. With fast access, experienced staff, and prompt reporting, we're committed to supporting your patients with high-quality, efficient imaging care—when they need it most.

Ultrasound Services - Avoid the Waitlists!

Book your ultrasound appointment today at our convenient locations in Bateau Bay, Killarney Vale, Erina, and Umina.

Ultrasound Saturday Appointments Available at Bateau Bay

We offer Saturday ultrasound appointments from
8:00AM to 12:00 PM.

Take the stress out of your week—book an appointment and relax in our comfortable waiting room. Let us take care of you!

Please note that ultrasounds are privately billed on a Saturday.

Quick Guide to CT Scan Indications

CT (Computed Tomography) is a fast, highly detailed imaging modality ideal for diagnosing a wide range of acute and chronic conditions. Below is a summary of common indications by body region.

Head and Brain:

- Headache (sudden/severe or new onset >50 years)
- Head trauma (especially with loss of consciousness or neurological signs)
- Suspected stroke or TIA
- Cognitive decline (initial scan or where MRI is contraindicated)
- Sinus disease (if persistent or complicated)

Chest:

- Pulmonary embolism (CT Pulmonary Angiography – CTPA)
- Chest pain (e.g. suspected aortic dissection, pericardial disease)
- Lung nodule assessment or cancer screening
- Chronic cough or unexplained respiratory symptoms
- Pre-operative or oncology staging

Abdomen & Pelvis:

- Abdominal pain (acute or unexplained, especially RUQ/LQ pain)
- Suspected appendicitis, diverticulitis, renal colic, or bowel obstruction
- Liver, pancreas, or kidney lesion evaluation
- Cancer staging or surveillance
- Unexplained weight loss or anemia

Musculoskeletal / Spine:

- Suspected fractures not seen on X-ray
- Spinal trauma or degenerative disease
- Assessment of bony lesions or tumours
- Joint prosthesis complications
- Pre-operative planning for orthopaedic surgery

Vascular:

- CT Angiography for:
 - Carotid stenosis
 - Aortic aneurysm or dissection
 - Peripheral vascular disease
 - Coronary CT Angiography
 - (for selected low-to-moderate risk chest pain)
